The decrease in income before provision for income taxes in Q4 2018 compared to Q4 2017 was primarily due to a \$553 million decrease in investment income, including performance allocations, net of related compensation. The decrease was partially offset by a \$98 million increase in fund management fees due to the commencement of the investment period for certain newly raised funds, and a \$33 million decrease in general, administrative and other expenses driven by net insurance recoveries.

As it relates to the full year, the decrease in income before provision for income taxes was primarily due to a \$869 million decrease in investment income, including performance allocations, net of related compensation, as well as a \$184 million increase in general, administrative and other expenses driven by a one-time lease assignment charge in 2018, lower insurance recoveries, and the reversal of certain litigation reserves in 2017. The decrease was partially offset by a \$245 million increase in fund management fees due to the commencement of the investment period for certain newly raised funds, and a \$71 million adjustment for the revaluation of the tax receivable agreement liability in 2017 related to the passage of the Tax Cuts and Jobs Act of 2017.

The loss before provision for income taxes for Q4 and the full year 2018 includes \$58 million in income from our equity method investment in Fortitude Re, which closed in Q4 2018. This amount includes \$46 million in gains from changes in fair value of embedded derivatives as a result of accounting principles related to derivatives and hedging (DIG B36⁽²⁾).

Net income (loss) attributable to The Carlyle Group L.P. Common Unitholders was \$(16) million or \$(0.15) per common unit on a diluted basis for Q4 2018 and \$93 million or \$0.82 per common unit on a diluted basis for 2018. The provision for income taxes for Q4 2017 and the full year 2017 includes \$113 million related to the revaluation of the net deferred tax assets resulting from the Tax Cuts and Jobs Act of 2017.

Carry Fund Appreciation and Net Accrued Performance Revenues

Carlyle's carry fund portfolio depreciated (2)% during Q4 2018, but appreciated 9% in 2018. During Q4 2018, the public portfolio in our Corporate Private Equity, Real Assets and Global Credit carry funds depreciated (27)%, reflecting volatile global equity markets as well as particular weakness in public energy investments. Valuations for the private portfolio, which accounts for more than 90% of the remaining fair value, depreciated only (1)%. Investment Solutions carry funds appreciated 2% during Q4 2018 and 19% in 2018. Fourth quarter carry fund valuations were negatively impacted by movement in the NGP Energy and U.S. Buyout funds, partially offset by strength in our seventh U.S. Real Estate fund, first Equity Opportunities fund and third Europe Technology fund.

Net Accrued Performance Revenues were \$1.7 billion as of Q4 2018, down 12% from the prior quarter, largely driven by the impact of fund valuations in the quarter. Compared to Q4 2017, the balance was down 2%, with performance revenue realizations slightly outpacing new accrual over the last twelve months.

Carlyle All Segment Results

- Distributable Earnings were \$211 million in Q4 2018 and \$674 million in 2018. Q4 2018 Distributable Earnings included \$175 million in Fee Related Earnings and \$43 million in Realized Net Performance Revenues. DE per common unit was \$0.57 for Q4 2018 and \$1.78 for 2018.
- Fee Related Earnings were \$175 million in Q4 2018, up from \$27 million in Q4 2017, and were \$350 million for 2018, up from \$192 million in 2017. During the fourth quarter, Fee Related Earnings were positively impacted by several items that we would not expect to recur at these levels, including \$32 million in insurance recoveries related to our former commodities business, \$25 million in transaction fees related to a few large investments, \$21 million of catch-up management fees and other incremental revenue, as well as \$10 million from lower G&A expenses. Adjusting for the impact of these items, Fee Related Earnings for Q4 2018 would be approximately \$90 million.
- Realized Net Performance Revenues were \$43 million in Q4 2018, and \$320 million in 2018, down from \$553 million in 2017. Realized Proceeds of \$24.0 billion in 2018 were below the \$26.0 billion in 2017, and a higher percentage of 2018 realization activity originated from funds accruing, but not yet realizing performance revenues, compared to 2017.
- Total Assets Under Management (“AUM”) of \$216.5 billion increased 11% compared to Q4 2017 through a combination of \$33.1 billion in fundraising and fund appreciation, partially offset by \$24.0 billion in realized proceeds to fund investors.
- Fee-earning AUM of \$159.6 billion increased 28% from Q4 2017, driven by fee activations for our latest generation U.S., Europe and Asia buyout funds during 2018. As of year-end 2018, there was \$6.5 billion in pending Fee-earning AUM that will turn on fees either through the activation of the underlying fund or additional capital deployment.

NOTES

Non-GAAP Financial Information

This press release contains financial measures that are calculated and presented on the basis of methodologies other than in accordance with generally accepted accounting principles in the United States of America. These non-GAAP financial measures should be considered in addition to and not as a substitute for, or superior to, financial measures presented in accordance with U.S. GAAP. The reasons management believes that these non-GAAP financial measures provide useful information are set forth in our most recent Annual Report on Form 10-K filed with the SEC.

Notes on Carlyle Consolidated GAAP Results (Page 2)

- (1) Income before provision for income taxes is the GAAP measure that is most directly comparable to Distributable Earnings, which management uses to measure the performance of the business. A full reconciliation is included on page 29. See "Non-GAAP Financial Information and Other Key Terms" for additional information.
- (2) Modified coinsurance is subject to the general accounting principles for derivatives and hedging, specifically the guidance originally issued as Derivatives Implementation Group Issue No. B36: *Embedded Derivatives: Modified Coinsurance Agreements and Debt Instruments That Incorporate Credit Risk Exposures That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor under Those Instruments* ("DIG B36").

Notes on Non-GAAP Operating Results (Page 3)

- (1) Represents the implied provision for current income taxes that was calculated using a similar methodology as that used in calculating the provision for current income taxes for The Carlyle Group L.P., without any reduction for non-controlling interests.
- (2) Represents current corporate income taxes payable on Distributable Earnings allocated to Carlyle Holdings I GP Inc. and estimated current Tax Receivable Agreement payments owed.

Notes on Carry Fund Appreciation and Net Accrued Performance Revenues (Page 4)

- (1) Appreciation/(Depreciation) represents unrealized gain/(loss) for the period on a total return basis before fees and expenses. The percentage of return is calculated as: ending remaining investment fair market value plus net investment outflow (sales proceeds minus net purchases) minus beginning remaining investment fair market value divided by beginning remaining investment fair market value. Fund only, does not include co-investment.
- (2) We generally earn performance revenues (or carried interest) from our carry funds representing a 20% allocation of profits generated on third-party capital, and on which the general partner receives a special residual allocation of income from limited partners, which we refer to as carried interest, in the event that specified investment returns are achieved by the fund. Disclosures referring to carry funds also include the impact of certain commitments that do not earn carried interest, but are either part of, or associated with our carry funds. The rate of carried interest, as well as the share of carried interest allocated to Carlyle, may vary across the carry fund platform. See "Non-GAAP Financial Information and Other Key Terms" for more information.
- (3) Natural Resources is comprised of NGP, infrastructure, power and international energy funds.
- (4) Includes the change in performance revenue accrual driven by positive or negative movements in portfolio valuation, incremental preferred return and fees, foreign exchange fluctuations and acquisition/divestiture activity.

Note on Investment Solutions (Page 9)

- (1) Includes Mezzanine funds.

Notes on Total Assets Under Management (Page 11)

- (1) Primarily comprised of expiring dry powder, the impact of capital calls for fees and expenses and changes in gross asset value for our business development companies.

- (2) Available Capital refers to the amount of capital commitments available to be called for investments, which may be reduced for equity invested that is funded via fund credit facility and expected to be called from investors at a later date, plus any additional assets/liabilities at the fund level other than active investments. Amounts previously called may be added back to available capital following certain distributions.
- (3) Remaining Fair Value generally reflects the unrealized carrying value of investments for all carry funds, related co-investment vehicles and separately managed accounts, the aggregate collateral balance of our CLOs and other securitization vehicles, and the gross asset value of our business development companies.
- (4) The In-Carry Ratio represents percentage of Remaining Fair Value in an accrued carry position.
- (5) Reflects the percentage of Remaining Fair Value attributable to investments originated in Q4 2014 or prior. Investments that include follow-on tranches are fully recognized based on the date of the initial investment activity.

Notes on Total AUM Roll Forward (Page 21)

- (1) Acquisition activity represents Carlyle Aviation Partners (formerly Apollo Aviation Group) assets which were acquired in a transaction that closed in December 2018.
- (2) New Commitments reflects the impact of gross fundraising during the period. For funds or vehicles denominated in foreign currencies, this reflects translation at the average quarterly rate, while the separately reported Fundraising metric is translated at the spot rate for each individual closing.
- (3) Outflows includes distributions in our carry funds, related co-investment vehicles, separately managed accounts and the NGP Predecessor Funds, as well as runoff of CLO collateral balances.
- (4) Market Appreciation/(Depreciation) generally represents realized and unrealized gains (losses) on portfolio investments in our carry funds and related co-investment vehicles, the NGP Predecessor Funds and separately managed accounts.
- (5) Represents the impact of foreign exchange rate fluctuations on the translation of our non-U.S. dollar denominated funds. Activity during the period is translated at the average rate for the period. Ending balances are translated at the spot rate as of the period end.
- (6) Includes expiring available capital, the impact of capital calls for fees and expenses, change in gross asset value for our business development companies and other changes in AUM.
- (7) The fair market values for our Investment Solutions carry funds are based on the latest available valuations of the underlying limited partnership interests (in most cases as of September 30, 2018) as provided by their general partners, plus the net cash flows since the latest valuation, up to December 31, 2018.

Notes on Fee-earning AUM Roll Forward (Page 21)

- (8) Acquisition activity represents Carlyle Aviation Partners (formerly Apollo Aviation Group) assets which were acquired in a transaction that closed in December 2018.
- (9) Inflows represents limited partner capital raised by our carry funds or separately managed accounts for which management fees based on commitments were activated during the period, the fee-earning commitments invested in vehicles for which management fees are based on invested capital, as well as the fee-earning collateral balance of new CLO issuance. Inflows exclude fundraising amounts during the period for which fees have not yet been activated, which are referenced as Pending Fee-earning AUM.
- (10) Outflows represents the impact of limited partner distributions from vehicles with management fees based on remaining invested capital at cost or fair value, changes in basis for funds where the investment period, weighted-average investment period or commitment fee period has expired during the period, reductions for funds that are no longer calling for fees, and runoff of CLO collateral balances. Distributions for funds earning management fees based on commitments during the period do not affect Fee-earning AUM.

- (11) Market Appreciation/(Depreciation) represents realized and unrealized gains (losses) on portfolio investments in our carry funds based on the lower of cost or fair value and net asset value.
- (12) Includes activity of funds with fees based on gross asset value. Represents the impact of foreign exchange rate fluctuations on the translation of our non-U.S. dollar denominated funds. Activity during the period is translated at the average rate for the period. Ending balances are translated at the spot rate as of the period end.
- (13) Energy III, Energy IV, and Renew II (collectively, the “Legacy Energy Funds”), are managed with Riverstone Holdings LLC and its affiliates. Affiliates of both Carlyle and Riverstone act as investment advisers to each of the Legacy Energy Funds. Carlyle has a minority representation on the management committees of Energy IV and Renew II. Carlyle and Riverstone each hold half of the seats on the management committee of Energy III, but the investment period for this fund has expired and the remaining investments in such fund are being disposed of in the ordinary course of business.

Notes on Fund Performance Tables (Page 22)

- (1) The data presented herein that provides “inception to date” performance results of our segments relates to the period following the formation of the first fund within each segment. For our Corporate Private Equity segment our first fund was formed in 1990. For our Real Assets segment our first fund was formed in 1997. For our Global Credit segment our first carry fund was formed in 2004.
- (2) Represents the original cost of investments since inception of the fund.
- (3) Represents all realized proceeds combined with remaining fair value, before management fees, expenses and carried interest.
- (4) Multiple of invested capital (“MOIC”) represents total fair value, before management fees, expenses and carried interest, divided by cumulative invested capital.
- (5) An investment is considered realized when the investment fund has completely exited, and ceases to own an interest in, the investment. An investment is considered partially realized when the total amount of proceeds received in respect of such investment, including dividends, interest or other distributions and/or return of capital, represents at least 85% of invested capital and such investment is not yet fully realized. Because part of our value creation strategy involves pursuing best exit alternatives, we believe information regarding Realized/Partially Realized MOIC and Gross IRR, when considered together with the other investment performance metrics presented, provides investors with meaningful information regarding our investment performance by removing the impact of investments where significant realization activity has not yet occurred. Realized/Partially Realized MOIC and Gross IRR have limitations as measures of investment performance, and should not be considered in isolation. Such limitations include the fact that these measures do not include the performance of earlier stage and other investments that do not satisfy the criteria provided above. The exclusion of such investments will have a positive impact on Realized/Partially Realized MOIC and Gross IRR in instances when the MOIC and Gross IRR in respect of such investments are less than the aggregate MOIC and Gross IRR. Our measurements of Realized/Partially Realized MOIC and Gross IRR may not be comparable to those of other companies that use similarly titled measures. We do not present Realized/Partially Realized performance information separately for funds that are still in the investment period because of the relatively insignificant level of realizations for funds of this type. However, to the extent such funds have had realizations, they are included in the Realized/Partially Realized performance information presented for Total Corporate Private Equity and Total Real Assets.
- (6) Fully Invested funds are past the expiration date of the investment period as defined in the respective limited partnership agreement. In instances where a successor fund has had its first capital call, the predecessor fund is categorized as fully invested.
- (7) Gross Internal Rate of Return (“Gross IRR”) represents the annualized IRR for the period indicated on Limited Partner invested capital based on contributions, distributions and unrealized value before management fees, expenses and carried interest.
- (8) Net Internal Rate of Return (“Net IRR”) represents the annualized IRR for the period indicated on Limited Partner invested capital based on contributions, distributions and unrealized value after management fees, expenses and carried interest. Fund level IRRs are based on aggregate Limited Partner cash flows, and this blended return may differ from that

of individual Limited Partners. As a result, certain funds may generate accrued performance revenues with a blended Net IRR that is below the preferred return hurdle for that fund.

- (9) Aggregate includes the following funds: CP I, CMG, CVP I, CVP II, CUSGF III, CEVP, CETP I, CAVP I, CAVP II, CAGP III, CSABF, CPF I, Mexico, CBPF, CCI and MENA.
- (10) Includes coinvestments, separately managed accounts (SMA's) and certain other stand-alone investments arranged by us.
- (11) Aggregate, which is considered not meaningful, includes the following funds and their respective commencement dates: CSSAF (April 2012), CAGP V (May 2016), CGFSP III (June 2017), and CBPF II (November 2017).
- (12) For funds marked "NM," IRR may be positive or negative, but is not considered meaningful because of the limited time since initial investment and early stage of capital deployment. For funds marked "Neg," IRR is negative as of reporting period end.
- (13) For purposes of aggregation, funds that report in foreign currency have been converted to U.S. dollars at the reporting period spot rate.
- (14) Aggregate includes the following funds: CRP I, CRP II, CAREP I, CAREP II, CRCP I, CPOCP, NGP GAP, Energy I and Renew I.
- (15) Aggregate includes CCR and CER. Return is not considered meaningful, as the investment period commenced in October 2016 for CCR and December 2017 for CER.
- (16) Aggregate includes the following funds: CMP I, CMP II, CSP I, CASCOF, SASOF II, and SASOF III.
- (17) Represents the original cost of investments net of investment level recallable proceeds which is adjusted to reflect recyclability of invested capital for the purpose of calculating the fund MOIC.
- (18) Fully Committed funds are past the expiration date of the commitment period as defined in the respective limited partnership agreement.
- (19) Includes private equity and mezzanine primary fund investments, secondary fund investments and co-investments originated by the AlpInvest team, as well as real estate primary fund investments, secondary fund investments and co-investments originated by the Metropolitan Real Estate team. Main Fund line items for each strategy reflect aggregated amounts and performance for commingled funds and associated managed accounts or mandates. Excluded from the performance information shown are a) investments that were not originated by AlpInvest, and b) Direct Investments, which was spun off from AlpInvest in 2005. As of December 31, 2018, these excluded investments represent \$0.2 billion of AUM at AlpInvest.
- (20) To exclude the impact of FX, all AlpInvest foreign currency cash flows have been converted to Euro at the reporting period spot rate.
- (21) Gross Internal Rate of Return ("Gross IRR") represents the annualized IRR for the period indicated on Limited Partner invested capital based on investment contributions, distributions and unrealized value of the underlying investments, before management fees, expenses and carried interest at the AlpInvest/Metropolitan Real Estate level.
- (22) Aggregate includes Main Fund VII - Fund Investments, Main Fund VIII - Fund Investments, Main Fund IX - Fund Investments, Main Fund I - Co-Investments, Main Fund I - Mezzanine Investments, Main Fund IV - Mezzanine Investments, Main Fund V - Mezzanine Investments, AlpInvest CleanTech Funds and funds which are not included as part of a main fund.
- (23) Represents the U.S. dollar equivalent balance translated at the spot rate as of period end.

Notes on Remaining Fair Value Analysis (Page 26)

- (1) Remaining Fair Value reflects the unrealized carrying value of investments for Corporate Private Equity, Real Assets and Global Credit carry funds and related co-investment vehicles. Significant funds with remaining fair value of greater than \$100 million are listed individually.
- (2) Unrealized multiple of invested capital (“MOIC”) represents remaining fair market value, before management fees, expenses and carried interest, divided by remaining investment cost.
- (3) Total MOIC represents total fair value (realized proceeds combined with remaining fair value), before management fees, expenses and carried interest, divided by cumulative invested capital. For certain funds, represents the original cost of investments net of investment-level recallable proceeds, which is adjusted to reflect recyclability of invested capital for the purpose of calculating the fund MOIC.
- (4) Represents cumulative invested capital as of the reporting period divided by total commitments. Amount can be greater than 100% due to the re-investment of recallable distributions to fund investors.
- (5) Fund has a net accrued performance revenue balance/(giveback obligation) as of the current quarter end, driven by a significant portion of the fund’s asset base.
- (6) Fund has generated realized net performance revenues/(realized giveback) in the last twelve months.
- (7) Represents the date of the first capital contribution for management fees.
- (8) Aggregate includes the following funds: CMG, CP I, CP II, CP III, CEP I, CEP II, CAP I, CAP II, CBPF, CBPF II, CJP I, CJP II, CEVP, CETP I, CETP II, CCI, CAVP I, CAVP II, CAGP III, CAGP V, Mexico, MENA, CSABF, CSSAF, CPF, CGFSP I, CGFSP III, CVP I, CVP II, and CUSGF III. In Accrued Carry/(Clawback) and LTM Realized Carry not indicated because the indicator does not apply to each fund within the aggregate.
- (9) Includes co-investments, pre-fund investments, separately managed accounts (SMA's) and certain other stand-alone investments arranged by us. In Accrued Carry/(Clawback) and LTM Realized Carry not indicated because the indicator does not apply to each fund within the aggregate.
- (10) Aggregate includes the following funds: CRP I, CRP II, CRCP I, CEREP I, CEREP II, CER, CAREP I, CAREP II, CCR, CPOCP, CIP, CGIOF, NGP GAP, Energy I, Energy II and Renew I. In Accrued Carry/(Clawback) and LTM Realized Carry not indicated because the indicator does not apply to each fund within the aggregate.
- (11) Aggregate includes the following funds: CSP I, CSP II, CMP I, CMP II, CSC, CASCOF, SASOF II, SASOF III, and SASOF IV. In Accrued Carry/(Clawback) and LTM Realized Carry not indicated because the indicator does not apply to each fund within the aggregate.
- (12) For purposes of aggregation, funds that report in foreign currency have been converted to U.S. dollars at the reporting period spot rate.
